# Core Biopsy Imaging at the point of care

## Better Patient Care

Helps to improve patient experience by reducing time spent under compression.

## Improves Workflow

Eliminate unnecessary delays and wirelessly transmits multiple images to PACS with a single click.

## High-Resolution Images

In seconds, instantly identify the most challenging microcalcifications.

## Increased Efficiency

5" x 3" detector allows for more to be captured in a single image.

## Smaller Footprint. Larger Imaging Area.
