

# Careverse CoronaryDoc

## “Scan to Report” AI Solution for Coronary CTA in 5 mins

### Seamlessly Integrated Fully-automated Workflow

- End-to-end coverage, including image quality assessing, post-processing, stenosis interpreting, reporting, and filming
- Outstanding reconstruction of difficult cases, including multiple stents, myocardial bridge, origin abnormality and etc.

### Robust AI-assisted Diagnosis

- Stenosis detection with 93% sensitivity and 90.9% specificity, stratification of stenosis severity in SCCT standard
- Identification of arterial dominance and origin abnormality
- Accurate detection and quantification of plaque, myocardial bridge, and stent with proven reliability

### Wide Adoption in Radiology Workflow

- 4,000+ Hospital installations with high user retention
